A Note about this System

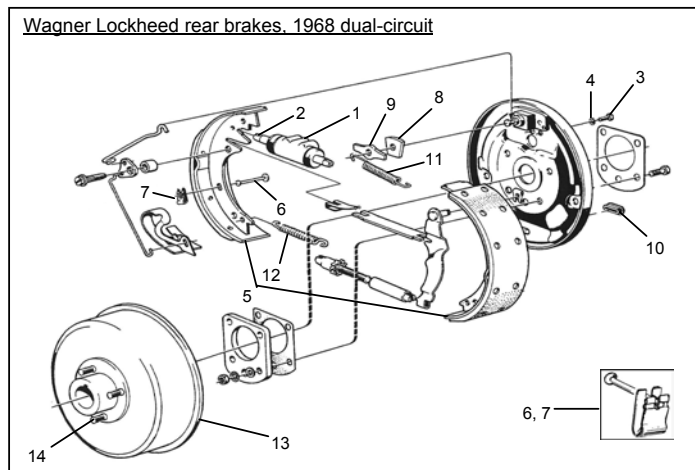

This particular system was an oddball one, as far as we can see hastily put together by Volvo in late 1967 to comply with US safety and local content regulations, which must have come into play at some stage during that year. The system uses Girling disc brakes at the front, coupled with Wagner Lockheed drum brakes at the rear, and with the peculiarity of a Girling remote brake servo which operates on the front wheels only. The master cylinder is of the dual-circuit tandem type, made especially for Volvo by Wagner Lockheed. Repair kits for the originals are available. We are now also able to offer a new complete (repro) cylinder (less the reservoir).

Dear Customer

Using correct part numbers when ordering

As you can see from the catalogue now on your screen or in your hand, we at CVI have gone to a lot of trouble to produce a catalogue which will enable you to identify the parts you want as easily as possible.

However, when you come to place an order (which we prefer to be made via our on-line Order Form) we cannot stress enough how important it is that you give us the correct part number for the item you want.

As you may have noticed, we sometimes offer you a choice between a genuine part as well as a reproduced item (or pattern part as they are sometimes referred to). The way we distinguish between these is to put an R or an (R) at the end of the part number, or even a dash and then a 1. Thus, a diaphragm for a Zenith-Stromberg carburettor has the part number 237385 for the genuine article, but part number 237385-R for the repro item. Note the difference in price on these: 237385 costs SEK 55, whilst 237385-R costs a mere SEK 15.

It is your responsibility to ensure that you give us the correct number for the item you want! We cannot return items where you have given us the incorrect number.

Minimum order value

Please note that we have a minimum order value of SEK 750 (excluding VAT & freight). It has become necessary for us to introduce this rule in order to allow for as efficient handling of incoming orders as possible - there is a lot of ancillary paperwork that is connected with each order.
